Natural materials offer ultimate designs. However, these natural materials are often less practical for use. Stone is heavy, wood needs intensive maintenance and real copper is expensive. To preserve our precious nature, EuraDesign offers the best possible equivalent.

EuraDesign features natural pre-coated designs on light, formable, easy to maintain and 100% recyclable aluminum. The examples are just the start. You are invited to create your own design.

EuraDesign collection

- EuraDesign 3 layers Polyvinylidene Fluoride (PVDF) and/or Fluor Polymer (Lumiflon)
- EuraDesign 2 layers Polyvinylidene Fluoride (PVDF)
- EuraDesign 2 layers High Durable Polymer (HDP)
- EuraDesign 2 layers Polyester (PE)

Guidelines

- Install panels in same direction to avoid orientation differences
- Pattern appearance may slightly vary
- Order projects in one batch
- More designs available on www.euramax.eu/euradesign
- Designs and warranties are interchangeable (upon request)
- New designs on request
